customers'™ technical specifications for air filtration systems . including factors such as: media fiber size, shape, pore size, thickness, weave and mechanical strength to name a few. These specifications play a critical part in ensuring our products meet the maximum filter capacity and life possible for each application.

Many industrial employees need to avoid exposure to airborne particulates, while certain industrial processes demand clean air of exceptional quality. Medical and biological fields rely on sterile air, while filtration can improve air quality in offices, homes and all types of transport. Filters act in a variety of complex and subtle ways.
