Direction & Quality of Light: Your Key to Better Portrait

signals from only one direction and reject those from other directions. Directivity indicates the antenna's ability to intercept signals arriving at its front and reject signals coming from the sides and rear. Generally, the more highly directive an antenna, the better it can reject signals from the sides and rear.

Installation Off-Air Antenna - Solid Signal

the amp's input gain accordingly. The PV 1500 is typical of a standard professional power amplifier in that either side of the power amp can be split into two separate halves (called stereo although it doesn't necessarily have to be used to amplify standard stereo signals) or else the amp can operate as a single high-powered unit (bridge mode).
