Infertility services, but the requirements for coverage vary from state to state. Legislative mandates and the member- specific benefit plan document must be reviewed when determining benefit coverage for Infertility services.

Infertility Diagnosis and Treatment - OXHP

The most common causes of male infertility are problems in the testes that affect how sperm are made or how they function. Age is a major factor in infertility. For healthy couples in their 20s or early 30s, the chance that a woman will become pregnant is about 25%–30% in any single menstrual cycle.

Treating Infertility - ACOG

syndrome, and polycystic ovary syndrome. In this way, infertility may serve as a marker of past, present, and future health and provide a window of opportunity to improve care for affected reproductive-aged women and men. Thus, infertility could have public health implications beyond simply the ability to have children.
