Special Relativity Leads to a Trans-Planckian Crisis that is Solved by Haug's Maximum Velocity for Matter.
Authors: Espen Gaarder Haug Comments: 5 Pages. In gravity theory, there is a well-known trans-Planckian
problem, which is that general relativity theory leads to a shorter than Planck length and shorter than Planck
time in relation to so-called black holes.

The hypothesis of linguistic relativity holds that the structure of a language affects its speakers' world view or
cognition. Also known as the Sapir-Whorf hypothesis, or Whorfianism, the principle is often defined to
include two versions: the strong hypothesis and the weak hypothesis: . The strong version says that language
determines thought and that linguistic categories limit and ...

The aim of these lecture notes is to provide a reasonably self-contained introduction to General Relativity,
including a variety of applications of the theory, ranging from the solar system to gravitational waves, black
holes and cosmology.

To correct this perceived flaw, Einstein thought he had to abandon what had been one of the central features of his emerging theory. Einstein's field equations are the equations of general relativity describe how the shape of space-time evolves in response to the presence of matter and energy.
